

iSi Nitro - 5 Tips for the perfect pour

1. Use cold brew made from 100% arabica beans, height of foam are dependent on cold brew recipe and amount of protein and pectin in the cold brew.
2. Only use pre-chilled cold brew directly from the fridge
3. Charge the iSi Nitro with charger and shake the whipper 4-6 times moderately. Let the cold brew/nitrogen mix settle for 5-10 seconds before dispensing. No need to reshake.
4. Use a cup/glass shape with conical shape 12 fl.oz. cup. Speed of cascading effect is related to shape of cup/glass
5. Place the dispensing tip towards the wall of the glass/cup and tilt the bottle when dispensing to create a swirl . This reduces the creation of bigger bubbles in the cup/glass
